OBJECTIVE

Software Engineer specializing in Laravel, MERN Stack, and RESTful API development. Experienced in building scalable web applications using PHP, JavaScript, React.js, Node.js, Express.js, MySQL, and MongoDB. Published researcher in Artificial Intelligence and Machine Learning with expertise in software design, backend development, and problem-solving.

SKILLS

Languages	PHP, C#, JavaScript, Python, Java
Backend	Laravel, Node.js, Express.js
Frontend	React.js, TailwindCss, Bootstrap
Database	MySQL, MongoDB, SQL Server
API Development	REST APIs, JWT Authentication, API Integration
Real-Time Technologies	Socket.io, WebSockets
Tools	Git, GitHub, Docker, Postman, Linux
Cloud	AWS(learning)

EXPERIENCE

Software Developer - Intern Oliqon	Feb 2026 - May 2026 <i>Dhaka, Bangladesh</i>
--	---

- Developed and maintained web application features using Laravel, PHP, MySQL, and REST APIs.
- Collaborated with senior developers to design, test, and debug backend modules, improving application reliability and performance.
- Used Git and GitHub for version control and team collaboration throughout the development lifecycle.
- Contributed to code reviews and followed software engineering best practices, including MVC architecture and clean coding standards.
- Participated in database design, query optimization, and bug fixing to enhance system efficiency.

PROJECTS

Medical Tourism Management System The Medical Tourism Management System is designed to manage patients traveling for medical treatment while integrating tourism-related services such as hotel booking, transport management, and visa processing. ([GitHub](#))

Ride Sharing Management. transiQo is a modern, full-stack ride-sharing application built with the MERN stack (MongoDB, Express, React, Node.js). It features real-time Socket.IO communication, Leaflet-powered map routing, dynamic fare calculation, a cash payment flow, and separate dashboards for passengers, drivers, and admins. ([GitHub](#))

EDUCATION

BSc in Computer Science and Engineering, International University of Business Agriculture and Technology Relevant Coursework: Data Structures and Algorithms, Database Systems, Software Engineering, Operating Systems, Computer Networks, Machine Learning.	CGPA: 3.24 May,2022 - June,2026
--	------------------------------------

Higher Secondary Certificate (HSC), Govt. Rajendra College	GPA:5.00 2020
--	------------------

Secondary School Certificate (SSC), Kormorpur Abdul Aziz Institution	GPA:5.00 2018
--	------------------

PUBLICATIONS

An Explainable Hybrid Transformer-Based Lightweight Framework for Lung Cancer Classification

Published by IEEE. Proposed a lightweight hybrid MobileNetV3-Vision Transformer framework with Explainable AI (XAI) techniques for lung cancer classification from histopathological images, achieving high diagnostic accuracy and model interpretability. [\(Paper Link\)](#)

Harnessing AI for Early Detection of Tomato Leaf Diseases: A Machine Learning Perspective

Published in Springer Nature, International Conference on Data Science, AI and Applications (2026). Developed an AI-based tomato leaf disease detection system using YOLOv9 to classify multiple plant diseases, improving early diagnosis and supporting precision agriculture. [\(Paper Link\)](#)

CERTIFICATION

Python with Machine Learning

[\(Certificate Link\)](#)

Completed comprehensive training on Python programming, data preprocessing, machine learning algorithms, model evaluation, and practical AI applications. Gained hands-on experience with NumPy, Pandas, Scikit-Learn, data visualization, and predictive modeling techniques.

Foundational C# with Microsoft

[\(Certificate Link\)](#)

Learned C# programming fundamentals, object-oriented design principles, problem-solving, and core .NET development concepts.
